REPRESENTING

DRYKEEP USA

Savannah, GA
www.drykeep.com

- *Dramatically increases the life of power transformers
- *Increases the dielectric strength and lifespan of the paper insulation, and FR3 or oil in older transformers
- *Helps maintain the dielectric strength and DP of the paper insulation, and the dielectric strength of the FR3 or oil in new transformers
- *Continually removes moisture from the paper insulation and oil of power transformers using molecular sieve technology to IEEE Standard C57-140-2006, section 7.2
- *Uses neither heat nor vacuum maintaining the integrity of dissolved gas analysis
- *Keeps new transformers dry, and dries older wet transformers

SORENSEN GOVERNOR by SORENSEN SYSTEMS

Northborough, Massachusetts
www.sorensensystems.com

- *Complete water to wire packages (15 KW units to 15 MW units)
- *Plant and unit upgrades
- *Water to wire systems integrator
- *Hydro automation systems (SCADA)
- *Hydraulic positioners, HPU's and governors
- *All electric (no oil) positioners and governors
- *Valve and gate actuator and operating systems
- *Self-contained actuator systems (submersible, explosion proof)
- *Metering and protection
- *Excitation systems
- *Switchgear
- *AWWA butterfly, ball and cone valves (12"-120")
- *In-line and kidney hydraulic filtration systems
- *Hydraulic oil vacuum dehydration systems
- *Oil coolers
- *Level & remote monitoring/control
- *Digital governor conversion systems:
 - Allis Chalmers
 - Lombard
 - S. Morgan Smith
 - Woodward
 - Sulzer
